

NATURAL TWIRL DIFFUSER

Mod. NTD

NATURALLY
VOLUMINOUS
CURLS

ULTRA-FAST
DRYING

Natural Twirl Diffuser creates a gentle air vortex that follows the natural movement of the hair during drying.

The innovative **AeroTwirl System**, developed through aerodynamic research, combines the unique shell shape with a central spiral air outlet to create an enveloping, even and continuous airflow.

Unlike a traditional diffuser, Natural Twirl Diffuser holds more hair and keeps it in gentle, continuous motion without compressing it during drying. This respects and enhances the natural curl pattern, helping to maintain volume, bounce and definition.

The result is ultra-fast drying for defined, voluminous, bouncy curls full of life.

**AeroTwirl
System**

BENEFITS

- NATURAL VORTEX AIRFLOW
- WIDER DRYING AREA
- GENTLE, CONTINUOUS HAIR MOVEMENT
- ULTRA-FAST DRYING
- COOL-TOUCH OUTER SURFACE
- DEFINED, BOUNCY & NATURALLY VOLUMINOUS CURLS
